Subject Index

Volume 28, 1995

Page numbers followed by (Abs) denote abstracts from the Twenty-first and Twenty-second Congresses on Electrocardiology.

Action potentials
duration affected by ethanol interactions with quinidine, 39
nicorandil affecting, in early ischemia (Abs), 82
propagation affected by barriers in two-dimensional model, 17
Activation maps
three-dimensional, in myocardial ischemia, 115
Activation-recovery interval
and reciprocal ECG changes, 237
Afterload
and ventricular arrhythmogenesis, 147
Age
and conduction system in centenarians (Abs), 78
and heart rate variability in centenarians (Abs), 83
and vectorcardiograms in children related to body size (Abs), 348
Alcohol intake
interaction with quinidine, 39
and ST-segment changes, 307
Angina pectoris
and T waves in spatial velocity ECG (Abs), 81
Anisotropy
and body surface potential maps (Abs), 346
and three-dimensional spread of excitation (Abs), 75
Arrhythmias
afterload and preload factors in, 147
J waves in, 49
Asystole
atrioventricular, after hiccups, 59
Atria
bradycardia-dependent activation delay in sick sinus syndrome, 261
exaggerated repolarization waves and exercise tests, 313
regional inhomogeneities in repolarization (Abs), 74
Atrial fibrillation
elicited by premature atrial beats, 297
paroxysmal, prediction in ischemic heart disease (Abs), 78
Atrioventricular asystole
after hiccups, 59
Atrioventricular block
advanced, and Wolff–Parkinson–White syndrome, 63
complete
from intravenous phenytoin, 157
progression from bundle branch reentrant tachycardia, 253
Atrioventricular node
properties of two myocyte populations (Abs), 352
triple pathways in AV nodal reentrant tachycardia (Abs), 76

Balloon pulmonary valvuloplasty
and changes in QRST-Imaps, 223
Belgian adult population
ECG abnormalities in, 1
Blood pressure
and ECG abnormalities in adult Belgians, 1
Body surface potential maps
in anisotropic and isotropic heart models (Abs), 346
clinical applications of (Abs), 334
components related to wall motion after myocardial infarction (Abs), 85
electric instability displayed after infarction (Abs), 354
electrode position changes affecting computer interpretations (Abs), 350
and epinephrine affecting recovery time in long QT syndrome (Abs), 86
in evaluation of paced QRS wave similarities (Abs), 84
lead system transformation in (Abs), 344
in malignant hypertension (Abs), 85
QRST-Imaps of postoperative right ventricular overload, 209, 223
Wilson terminal voltage in (Abs), 336

Bradycardia
and atrial activation delay in sick sinus syndrome, 261
Bundle branch block
left, interrupted sites related to QRS morphologies (Abs), 82
right
disappearance during exercise, 323
QRST isointegral maps of, 209
Bundle branch reentrant tachycardia
progression to complete atrioventricular block, 253

Calcium
current in cardiomyocytes affected by propofol (Abs), 332
exchange with sodium in sinoatrial node cells, 135
Cardiomyopathy
dilated, differentiated from coronary artery disease, 231
septic, and long QT syndrome, 327
Cardioverter-defibrillators, implantable
third-generation, clinical benefits of (Abs), 83
Case reports
advanced AV block and Wolff–Parkinson–White syndrome, 63
atrioventricular asystole after hiccups, 59
bradycardia-dependent atrial activation delay, 261
bundle branch reentrant tachycardia and complete AV block, 253
complete AV block from intravenous phenytoin, 157
disappearance of right bundle branch block during exercise, 323
marked PR interval prolongation during exercise, 153
septic cardiomyopathy and long QT syndrome, 327
thyroid disease with hypokalemic periodic paralysis and ventricular tachycardia, 161
ventricular couplets in concealed trigeminy, 69
Catecholamine levels
and ST-segment changes after ethanol intake, 307
Centenarians
conduction system in (Abs), 78
heart rate variability in (Abs), 83
Children
heart rate control during sleep in infants (Abs), 356
QRST-Imaps of postoperative right ventricular overload, 209, 223
vectorcardiograms related to body size (Abs), 348
Chinese man
thyroid disease with hypokalemic periodic paralysis and ventricular tachycardia, 161
Computer analysis
comparison of digitized ECGs, 287
electrode position changes affecting (Abs), 350
improved ECG detection of myocardial infarction (Abs), 74
interpretations of combined ECG plus VCG (Abs), 75
and reconstruction of 12-lead ECG from proximal limb lead placement, 33
and three-dimensional mapping study, 115
for twelve-lead vectorcardiography in infarction diagnosis, 169
Computer models
anisotropic and isotropic heart models (Abs), 346
propagated action potentials in two-dimensional cardiac tissue, 17
Conduction system
histopathology in centenarians (Abs), 78
Contractility of heart
affected by ethanol interactions with quinidine, 39
Coronary arteries
potassium channels in smooth muscle cells affected by lysophosphatidylcholine (Abs), 73
Coronary artery disease
bypass grafting in, and atrial fibrillation elicited by premature atrial beats, 297
differentiated from dilated cardiomyopathy, 231
infarction in. *See* Myocardial ischemia and infarction
prediction of paroxysmal atrial fibrillation in (Abs), 78
QRS notching and slurring in, 199
and ST-segment related to heart rate during exercise (Abs), 76
ventricular gradient variability in, 177
Couplets
ventricular, in concealed trigeminy, 69

Delta waves
newly developed, and AV conduction through Kent bundle, 63
Depolarization
ventricular, alterations during PTCA (Abs), 85
Digitized ECGs
comparison of chest-right arm and V leads, 287
Diuretics
and ECG abnormalities in adult Belgians, 1
Dobutamine test
after myocardial infarction, 91

Electric field, cardiac
changes in held-deep inspiration (Abs), 84
Epidemiologic study
ECG abnormalities in adult Belgians, 1
Epinephrine
recovery time response to, in body surface maps in long QT syndrome (Abs), 86
serum levels of, and ST-segment changes after ethanol intake, 307
Ethanol intake
interaction with quinidine, 39
and ST-segment changes, 307
Excitation
three-dimensional spread in anisotropic heart muscle (Abs), 75
Exercise
and disappearance of right bundle branch block, 323
heart rate and R wave amplitude changes in, 99
marked PR interval prolongation in, 153
predictors of false positive tests, 313

predischarge test compared to ischemia monitoring with vectorcardiography, 277
and reconstruction of 12-lead ECG from proximal limb lead placement, 33
and ST-segment related to heart rate in coronary artery disease (Abs), 76
Extrasystoles
and supernormal conduction in reentrant pathway, 69

Fibrillation, atrial
elicited by premature atrial beats, 297
paroxysmal, prediction in ischemic heart disease (Abs), 78

Gender
and ECG abnormalities in adult Belgians, 1
and ECG findings in myocardial infarction, 13

Heart block
advanced AV block and Wolff-Parkinson-White syndrome, 63
and cardiac propagation in two-dimensional model, 17
complete atrioventricular
from intravenous phenytoin, 157
progression from bundle branch reentrant tachycardia, 253
left bundle branch, and interrupted sites related to QRS morphologies (Abs), 82
right bundle branch
disappearance during exercise, 323
QRST isointegral maps of, 209
Heart rate
control during sleep in infants (Abs), 356
exercise-induced changes in, 99
relation to ST-segment during exercise in coronary artery disease (Abs), 76
variability
in centenarians (Abs), 83
in sick sinus syndrome, 245
Hiccups
and atrioventricular asystole, 59
Holter monitoring
and signal-averaged ECG in myocardial ischemia (Abs), 87
Hyperpolarization
sodium-free, mechanisms in, 135
Hypertension
malignant, body surface potential mapping in (Abs), 85
mild, and ECG criteria for left ventricular hypertrophy diagnosis (Abs), 80
Hypokalemic periodic paralysis
with thyroid disease and ventricular tachycardia, 161

Impedance mismatch
and AV conduction through Kent bundle, 63
Infarction. *See* Myocardial ischemia and infarction
Inspiration, deep
and changes in cardiac electric field (Abs), 84
Inverse problem
in electrocardiography (Abs), 342
Ischemic heart disease. *See* Coronary artery disease

J waves
origin and pathophysiology of, 49

Kent bundle
AV conduction through, with impedance mismatch, 63

Laplacian interpolation
in body surface mapping (Abs), 344
Late potentials
comparison of measurement techniques (Abs), 81
single beat extraction procedure (Abs), 340
Lead placement, proximal
and reconstruction of standard 12-lead ECG, 33
Letter to the Editor
shift from left to right axis deviation during ischemia, 165
Long QT syndrome
body surface maps in, and recovery time response to epinephrine (Abs), 86
in septic cardiomyopathy, 327
Lysophosphatidylcholine
affecting potassium channels in coronary artery smooth muscle cells (Abs), 73

Myocardial ischemia and infarction
body surface mapping in (Abs), 334
computerized three-dimensional mapping study, 115
diagnosis with 12-lead vectorcardiography, 169
dobutamine test after, 91
and electric instability displayed in body surface maps (Abs), 354
evaluation with Holter signal-averaged ECG (Abs), 87
improved computer ECG detection of (Abs), 74
and late potentials in signal-averaged ECG (Abs), 338
monitoring with vectorcardiography compared to predischarge exercise test, 277
and nicorandil affecting action potentials in early ischemia (Abs), 82
prediction of ventricular tachycardia after (Abs), 77
and reconstruction of 12-lead ECG from proximal limb lead placement, 33
and sex-related differences in ECGs, 13
transient decrease of R wave in (Abs), 79
viability after thrombolysis related to QRS score, 185
wall motion after, related to body surface potential distribution (Abs), 85

Myocytes
atrioventricular, properties of two distinct populations (Abs), 352
ventricular
affected by ethanol interactions with quinidine, 39
propofol affecting calcium current in (Abs), 332
Nicorandil
affecting action potentials in early ischemia (Abs), 82

Pacing
and interruption of reentrant tachycardia, 107
Phenytoin
intravenous, complete atrioventricular block from, 157
Phosphate levels
and ECG abnormalities in adult Belgians, 1
Position paper
on J wave origins, 49
Potassium
channel opener nicorandil effects in ischemia (Abs), 82
serum levels of, and ECG abnormalities in adult Belgians, 1
PR interval
marked prolongation in exercise test, 153
Prediction
of left ventricular hypertrophy in mild hypertension (Abs), 80
of paroxysmal atrial fibrillation in ischemic heart disease (Abs), 78
of ventricular tachycardia after myocardial infarction (Abs), 77
Preload
and ventricular arrhythmogenesis, 147
Premature beats
atrial, eliciting atrial fibrillation, 297
ventricular, activation sequences in myocardial ischemia, 115
B>Propofol
affecting calcium current in cardiomyocytes (Abs), 332
Protein kinase A
affecting cardiac sodium channel kinetics (Abs), 73
Pulmonary valvuloplasty, balloon
and changes in QRST-Imaps, 223

Q wave
unexplained gradual-onset patterns, 267
QRS complex
axis deviation in adult Belgians, 1
determinants of amplitudes (Abs), 80
duration during PTCA (Abs), 85
morphologies related to interrupted sites in left bundle branch (Abs), 82
notching and slurring in coronary artery disease, 199
quantitative evaluation of paced wave similarities (Abs), 84
Selvester score related to myocardial viability after thrombolysis, 185
QRST
deflection area, temperature or coronary occlusion affecting, 237
isointegral maps
after balloon pulmonary valvuloplasty, 223
of postoperative right ventricular overload, 209, 223
values in 12-lead ECG in Wolff–Parkinson–White syndrome (Abs), 86
Quinidine
interaction with ethanol, 39

R wave
exercise-induced changes in amplitude, 99
transient decrease during hyperacute myocardial ischemia (Abs), 79
Reciprocal ECG changes
activation-recovery interval in, 237
Reentrant tachycardia
bundle branch, progression to complete atrioventricular block, 253
interruption by pacing, 107
Reentry
atrial, and repolarization inhomogeneities in right atrium (Abs), 74
and supernormal conduction in pathway of extrasystoles, 69
Repolarization
atrial
and exercise tests, 313
in right atrium, regional inhomogeneities in (Abs), 74
detection of abnormalities in postoperative right ventricular overload, 209, 223
disparities in arrhythmogenic right ventricular dysplasia (Abs), 77
dispersion in ventricular tachycardia (Abs), 79
ventricular, acute volume load affecting (Abs), 86

Septic cardiomyopathy
and long QT syndrome, 327
Sex factors
and ECG abnormalities in adult Belgians, 1
and ECG findings in myocardial infarction, 13
Sick sinus syndrome
bradycardia-dependent atrial activation delay in, 261
heart rate variability in, 245
Signal-averaged ECGs
comparison of measurements from two devices (Abs), 81
and Holter monitoring in myocardial ischemia (Abs), 87
late potentials in ischemia (Abs), 338
single beat late potentials extracted in (Abs), 340
Sinoatrial node
dysfunction
bradycardia-dependent atrial activation delay in, 261
heart rate variability in, 245
sodium-calcium exchange in cells, 135
spontaneous pacemaker shifts, 131
Sleep
in infants, heart rate control in (Abs), 356

Sodium
cardiac channel kinetics affected by protein kinase A (Abs), 73
exchange with calcium in sinoatrial node cells, 135
Spatial velocity ECG
T waves in effort angina pectoris (Abs), 81
ST-segment
abnormalities in adult Belgians, 1
changes after ethanol consumption, 307
postinfarction dobutamine-induced elevation of, 91
relation to heart rate during exercise in coronary artery disease (Abs), 76
Supernormal conduction
in reentrant pathway of extrasystoles, 69

T waves
changes in adult Belgians, 1
normal amplitudes, 191
in spatial velocity ECG, in effort angina pectoris (Abs), 81
Tachycardia
paroxysmal supraventricular, from ventricular couplets in concealed trigeminy, 69
reentrant
atrioventricular nodal, triple AV nodal pathways in (Abs), 76
bundle branch, progression to complete AV block, 253
interruption by pacing, 107
ventricular
activation sequences in myocardial ischemia, 115
after tetralogy of Fallot correction (Abs), 83
body surface mapping in (Abs), 334
dispersion of repolarization in (Abs), 79
prediction after myocardial infarction (Abs), 77
with triiodothyronine toxicosis and hypokalemic periodic paralysis, 161
Tetralogy of Fallot correction
ventricular tachycardia after (Abs), 83
Three-dimensional mapping
computerized, 115
Thrombolytic therapy
and myocardial viability related to QRS score, 185
Thyroid disease
with hypokalemic periodic paralysis and ventricular tachycardia, 161
Torsade de pointes
in septic cardiomyopathy with long QT syndrome, 327
Tortuosity
and cardiac propagation in two-dimensional model, 17
Trigeminy
concealed, ventricular couplets in, 69
Triiodothyronine toxicosis
with hypokalemic periodic paralysis and ventricular tachycardia, 161
Twelve-lead ECGs
in differentiation of dilated cardiomyopathy from coronary artery disease, 231
QRST values in Wolff–Parkinson–White syndrome (Abs), 86
reconstruction from proximal limb lead positions, 33
results provided by different computer programs (Abs), 75
and vectorial information for infarction diagnosis, 169
Two-dimensional cardiac model
barriers affecting propagation of action potentials in, 17

Uric acid levels
and ECG abnormalities in adult Belgians, 1

Vectorcardiography
of children, related to body size (Abs), 348
combined with ECG, computer interpretations of (Abs), 75
in ischemia monitoring, compared to predischarge exercise test, 277
twelve-lead, for infarction diagnosis, 169
Ventricles
concealed trigeminy with couplets, 69
conduction defects in adult Belgians, 1
contractility affected by ethanol interactions with quinidine, 39
deoplarization alterations during PTCA (Abs), 85
gradient variability in ischemic heart disease, 177
left
acute volume load affecting repolarization properties (Abs), 86
hypertrophy evaluation with ECG criteria in mild hypertension (Abs), 80
myocyte calcium current affected by propofol (Abs), 332
preload and afterload affecting, 147
right
dysplasia of, recovery disparities in (Abs), 77
QRST-Imaps of postoperative overload, 209, 223
surface activation imaging (Abs), 342
Ventricular tachycardia
activation sequences in myocardial ischemia, 115
after tetralogy of Fallot correction (Abs), 83
body surface mapping in (Abs), 334
dispersion of repolarization in (Abs), 79
prediction after myocardial infarction (Abs), 77
with triiodothyronine toxicosis and hypokalemic periodic paralysis, 161

Wolff–Parkinson–White syndrome
and advanced atrioventricular block, 63
body surface mapping in (Abs), 334
QRST values of 12-lead ECG in (Abs), 86

X,Y,Z scalar ECGs
in measurement of ventricular gradient variability, 177
